JOB OBJECTIVE

Targeting opportunities in **Senior Software Developer and Technical Lead** positions in **Product & Service-Based Industries**, preferably in **Mumbai**.

CORE COMPETENCIES

- Software Development Lifecycle
- API Integration
- User Experience Design
- Agile Methodologies
- Cloud Computing
- Performance Optimization
- Database Management
- Front-end Architecture
- Continuous Integration/Continuous Deployment (CI/CD)
- Test-Driven Development (TDD)

TECHNICAL SKILLS

- ReactJs
- NextJs
- Redux
- Angular
- Typescript
- JavaScript
- NodeJS
- Java
- HTML5
- CSS3
- MongoDB
- Docker
- SQL
- SEO
- GitHub Copilot

EDUCATION

B.E/B.Tech. (Computer Science)
from Pillai's HOC College of Engineering and Technology, Mumbai University, Mumbai in 2016

Diploma in Computer Engineering
from Abdul Razzak kalsekar Polytechnic, Mumbai in 2013.

PROFILE SUMMARY

- Senior Software Developer **with over 9 years of experience in developing** web applications to meet the goals and objectives of the organization.
- Currently working as an Engineer Technology with Iris Software Pvt. Ltd, directing the development of intricate web applications and upholding the highest standards in coding practices and project management methodologies.
- Proficient in various programming languages and frameworks, **including ReactJs, Angular, and NodeJs**, while also honing skills in full-stack development and agile methodologies throughout the career.
- Drove the **complete lifecycle of the REMS Web Application, from initial concept through** to deployment, resulting in substantial improvements in user experience and operational effectiveness for clients.
- Demonstrated exceptional leadership abilities by guiding team members through mentorship, while cultivating an environment that encourages teamwork and ongoing enhancement of development practices.
- Possessing in-depth knowledge of modern web technologies and frameworks, including Material Design and AG Grid, which have been instrumental in creating responsive and user-friendly applications.
- Realized a significant decrease in application load times through strategic code optimization and the application of industry best practices, leading to enhanced user satisfaction and engagement levels.
- Showcased proficiency in the integration of third-party services and APIs, improving application functionality and user experience, while facilitating smooth interactions between front-end and back-end systems.
- Proficient in leveraging modern software development practices, including Agile methodologies and Test-Driven Development (TDD), to enhance team productivity and deliver high-quality software solutions that meet client needs.
- Leveraged GitHub Copilot to accelerate feature development, reduce boilerplate code, and improve overall development efficiency while maintaining high code quality standards.

ACHIEVEMENTS

Iris Software

- Successfully launched and deployed the Oneview application in production in February 2025.
- Successfully launched the Rems application in production in 2024.
- Received two accolades in 2024 for outstanding client feedback.
- Honored as the Best Employee of the Month in November 2021.

MyGlamm

- Developed the MyGlamm website from the ground up and deployed it to production.

WORK EXPERIENCE

Sep'21- Present: Engineer Technology at Iris Software Pvt. Ltd., Noida

Key Result Areas:

- Providing overall leadership to the entire project team, including managing deliverables of other functional team leaders.
- Managing large and complex projects or multiple components of a large project involving more than one company's product.
- Liaising with internal/external clients to determine specific requirements and expectations; managed client expectations as an indicator of quality.
- Creating and managing the estimates, project plan, project schedule, resource allocation, and expenses to ensure that targets were reached.
- Developing the REMS Web Application from the ground up utilizing ReactJS with Material Design and AG Grid libraries.

PERSONAL DETAILS

- **Languages Known:** Hindi & English
- **Address:** Mumbai-400043, Maharashtra.

- Providing mentorship to team members, promoting best practices for code maintainability and project management within the ReactJS ecosystem.
- Leading the implementation of the OneView web application to enhance the dealer-client relationship.
- Designing and implementing front-end architecture and established common code libraries.
- Participated in PI planning sessions every three months, breaking down tasks into manageable components, tracking progress, and adapting plans as necessary.
- Estimating tasks and assigned story points in Jira, ensuring efficient tracking and management of project tickets.
- Implementing a continuous integration pipeline using Docker to streamline deployment
- Utilizing AG Grid to create dashboards and a tabular structure for trade listings.
- Contributed to the development and maintenance of several trade-related web applications, including Accountmaster, InstrumentAdmin, Sanction Bond, and DealerAdmin.
- Collaborated closely with the solution architecture team and reporting manager to align development efforts with project goals
- Developed and executed Jest test cases for various applications to ensure high code quality and stability.
- Worked directly with US and UK clients, specifically Marketaxess, to address requirements and deliver solutions.
- Engaged in both front-end and back-end development, optimizing code for performance improvements and ensuring the smooth operation of web applications.
- Actively resolved production bugs and issues in a timely manner to ensure system stability.
- Created SQL script templates for updating or modifying database structures as needed.

Jan'18-Sep'21: Software Engineer at Myglamm, Mumbai.

Key Result Areas:

- Developed the Myglamm E-commerce Website from the ground up.
- Created a seamless checkout flow to enhance the customer purchase experience.
- Migrated the Myglamm website from Angular to ReactJs/NextJs, including the development of a React-based search component. Optimized the website for both desktop and mobile, resolving bugs and improving performance.
- Implemented server-side rendering for better website crawling and caching, and upgraded the site to use the latest versions of JavaScript libraries and frameworks for enhanced performance.
- Integrated payment gateways such as Citrus and Razorpay into the website for secure transactions.
- Implemented token authentication using an Interceptor for secure user access.
- Conducted scalability and responsiveness testing and deployed the site to production, ensuring smooth performance monitoring.
- Integrated i18n Localization for multilingual support in Angular.
- Applied lazy loading to optimize mobile website performance.
- Troubleshot issues using AWS console logs to ensure website reliability.
- Developed an SMS portal for the Myglamm support team to manage customer communications via bulk SMS.
- Implemented AMP pages for faster mobile page loads.
- Built and integrated a CMS (Content Management System) for the Myglamm websites, including Google Analytics for performance tracking and SEO strategies for increased website traffic.
- Conducted A/B testing to improve conversion rates on key pages.
- Optimized mobile website performance to improve page load scores.
- Integrated various analytics and marketing tools, such as GTM, Adobe, Facebook Pixel, WebEngage, ClevarTap, and Cretio.
- Added Google Schema to enhance search engine optimization.
- Developed REST APIs in Node.js for backend services.
- Led a frontend team for 6 months, guiding them through successful project completion.

PREVIOUS EXPERIENCE

Feb'17-Dec'17: Product Trainee Engineer at BridgeLabz Solution LLP, Mumbai

ANNEXURE

PROJECTS

Iris Software Pvt. Ltd.:

Project: Regulatory Execution Management System (REMS) Web Application

Duration: April 30, 2024 – Present

Description: Developed a web-based REMS to streamline trade reporting, compliance monitoring, and order execution for financial markets. The application ensures adherence to global regulations (MiFID II, SEC, FINRA) by enabling real-time trade execution, automated compliance validation, and exception handling. It integrates with market data sources, FIX protocol, and external trading platforms, while providing a secure, role-based access control system and a regulatory compliance dashboard with audit trail functionality.

Technology: ReactJS, Redux, JavaScript, Node.js, Java, Oracle SQL

Oneview Portal:

Role: React Developer

Company: Iris Software

Duration: September 8, 2021 – Present

Description: A Dealer Admin portal where clients can approve, deny, and deactivate products for specific groups and regions. It also allows users to add primary sales coverage and comments.

Technologies: React, Redux, HTML, CSS, Marketaxess Shared Library (Material Design).

Linx AccountMaster:

Role: Full Stack Developer

Company: Iris Software

Duration: January 5, 2021 – Present

Description: This portal handles details of countries, clients, dealers, and products, along with relationships between clients, dealers, and counterparties. My role involves maintaining features and updating the portal based on client requests.

Technologies: Angular, JavaScript, HTML, CSS, Java, Oracle SQL.

Instrument Admin Portal:

Role: Full Stack Developer

Company: Iris Software

Duration: December 2, 2021 – Present

Description: A trading platform enabling users to trade instruments like loans, cash, and bonds. My responsibility is to maintain and update features as needed.

Technologies: Angular, JavaScript, HTML, CSS, Java, Oracle SQL.

Dealer Admin Portal:

Role: Full Stack Developer

Company: Iris Software

Duration: November 9, 2022 – Present

Description: A Dealer Admin portal allowing clients to approve, deny, or deactivate products for specific groups and regions, and add primary sales coverage and comments.

Technologies: SmartClient, JavaScript, HTML, CSS, Java, Oracle SQL.

Good Glamm Group (Former Myglamm):

E-Commerce Mobile Website V2:

Role: React Developer

Company: MyGlamm

Duration: February 18, 2020 – August 30, 2021

Description: MyGlamm is a product-based company selling cosmetics and beauty products both online and in select lifestyle stores. My responsibility is to develop and maintain the mobile website. Initially built using Angular Universal, I migrated the website to React. Additionally, I contribute to tracking website analytics.

Technologies: React, Nextjs, Redux, SSR, Socket.io, HTML, CSS, Analytics Events.

Link: [MyGlamm Mobile Website](#)

E-commerce Website:

Role: React Developer

Company: MyGlamm

Duration: June 1, 2020 – August 30, 2021

Description: POPxo is India's largest online community for women, combining content and commerce.

Technologies: React, Redux, SSR, HTML, CSS, Analytics Events, AMP Pages.

Link: [POPxo](#)

E-Commerce Mobile Website:

Role: Angular Developer

Company: MyGlamm

Duration: December 10, 2017 – March 9, 2020

Description: MyGlamm sells beauty products online and in select stores. I was responsible for developing and maintaining their mobile website, which was built using Angular Universal. Additionally, I contributed to website analytics.

Technologies: Angular (4-8), Angular Universal SSR, Bootstrap, HTML, CSS.

Link: [MyGlamm Mobile Website](#)

QRCode Verifier:

Role: React Developer

Company: MyGlamm

Duration: April 4, 2020 – August 30, 2021

Description: This module verifies the authenticity of MyGlamm products.

Link: [QRCode Verifier](#)

E-Commerce Mobile Website (L'OCCITANE):

Role: Angular Developer

Company: MyGlamm

Client: L'OCCITANE AU BRESIL

Duration: July 10, 2019 – December 30, 2019

Description: L'OCCITANE AU BRESIL is a Brazilian cosmetics company. I developed and maintained their mobile website, providing services as part of MyGlamm's client portfolio.

Technologies: Angular (4-6), Angular Universal SSR, Language Translation, Bootstrap, HTML, CSS.

Link: [L'OCCITANE Mobile Website](#)

E-Commerce Admin V2 (Content Management System):

Role: Angular Developer

Company: MyGlamm

Duration: May 1, 2020 – August 30, 2021

Description: This admin panel is used by product and customer support teams to manage products, customers, discounts, orders, and other content. The panel is built using Angular 10.

Technologies: Angular 10, Bootstrap, HTML, CSS, Socket.io.

E-Commerce Admin (Content Management System):

Role: Angular Developer

Company: MyGlamm

Duration: October 1, 2017 – December 9, 2017

Description: Built a content management system from scratch, used by the product and customer support teams to manage various aspects of MyGlamm's website.

Technologies: Angular 2, jQuery, Bootstrap, HTML, CSS.

E-commerce (Backend):

Role: NodeJS Developer

Company: MyGlamm

Duration: 1 month

Description: I worked on MyGlamm's backend, developed in Node.js using the Loopback framework, focusing on mail and SMS templates to notify consumers.

Technologies: Node.js, MongoDB.

Artist Rating (Backend):

Role: NodeJS Developer

Company: MyGlamm

Duration: 2 months

Description: This module collects customer feedback on artists who provided services. I developed an API to handle and store this feedback.

Technologies: Node.js, ExpressJS, MongoDB, MySQL.

Unity:

Role: AngularJS Developer

Company: MyGlamm

Duration: 1 month

Description: Unity was a dashboard built to manage artists, clients, orders, appointments, availability, and invoices for MyGlamm's beauty services.

Technologies: AngularJS, jQuery, Bootstrap, HTML, CSS, Node.js, SQL.

Link: [Unity Dashboard](#)

SMS Portal:

Role: Angular Developer

Company: MyGlamm

Duration: 1 month

Description: I developed the SMS Portal module, enabling MyGlamm to send bulk SMS to consumers. The portal allows users to upload consumer details from an Excel file and send messages.

Technologies: AngularJS/2, jQuery, Bootstrap, HTML, CSS
