PROFILE SUMMARY

Senior Software Engineer with 9+ years of experience specializing in frontend architecture, modern web applications, micro-frontends, and AI UI integrations across EdTech, FinTech, and E-commerce domains. Core frontend expert in React.js, Next.js, TypeScript, Redux, React Flow (node-based workflows), AG Grid (high-density dashboards), Material Design, and Angular, paired with agentic UI engineering (AgentStudio, MCP, AI Chatbots). Supported by backend capabilities in Node.js (4 yrs), Express.js, Java (2 yrs), and SQL/NoSQL databases, alongside self-paced Python development. Proven track record of architecting enterprise platforms for tier-1 global clients including ETS and MarketAxess. Trained in Generative AI, ChatGPT, and GitHub Copilot (Udemy) to accelerate development velocity and optimize web performance.

TECHNICAL SKILLS

Frontend Architecture (Core): React.js, Next.js, Angular, Redux, TypeScript, JavaScript (ES6+), HTML5, CSS3, Material Design, AG Grid.

AI Tooling & Agentic UIs: AgentStudio UI Engineering, Agent Orchestration Interfaces, Conversational UI Design, Chatbot Response Rendering, GitHub Copilot (AI-Assisted Development), Prompt Engineering Basics.

Backend, Scripting & Databases: Node.js (4 yrs), Express.js, Python (Agent Tooling/Scripts), Java (2 yrs), REST APIs, MongoDB, Oracle SQL, MySQL

Architecture & Tools: Micro-services, SSR, AMP, Micro-frontends, Docker, CI/CD, Git, Jest, TDD.

Performance & Analytics: Web Vitals Optimization, SEO, Schema, GTM, Adobe Analytics, CleverTap, AWS (Logs).

WORK EXPERIENCE

Iris Software Pvt. Ltd. | Sep 2021 – Present

Engineer Technology (Automation Practice)

Client Projects: Educational Testing Service (ETS) & MarketAxess (US/UK)

- **Agentic AI & Web Application Development:** Contributing to frontend engineering for AgentStudio, building interactive web interfaces in React (supported by Python backends) to configure, orchestrate, and monitor autonomous AI agents and execution workflows.
- **Conversational AI UI (ETS):** Engineered the interactive frontend for an AI-powered chatbot application (HiSet Chatbot) using Next.js, managing UI state, streaming backend response payloads, and rendering conversational data transformations for end-users.
- **AI-Assisted Development:** Applied GitHub Copilot across feature development cycles to automate boilerplate code, streamline refactoring, and improve development efficiency while maintaining strict code standards.

- **Core Product Engineering:** Architected and deployed the Regulatory Execution Management System (REMS) and OneView Portal from scratch using React.js, Material Design, and AG Grid, facilitating real-time trade execution and compliance monitoring under global financial regulations (MiFID II, SEC, FINRA).
- **Performance & Scale:** Developed high-density trade dashboards utilizing AG Grid, optimizing rendering cycles to efficiently display high-frequency financial datasets.
- **Full-Stack Maintenance:** Supported core enterprise modules (Linx AccountMaster, InstrumentAdmin, DealerAdmin) by handling full-stack updates across Angular frontends and Java/Oracle SQL backends.
- **Agile Collaboration & Mentorship:** Participated in quarterly PI planning sessions and sprint task estimation (Jira); mentored junior developers on frontend best practices, component architecture, and unit testing with Jest (TDD).
- **Recognitions:** Honoured with 2 Client Appreciation Awards (2024) and named Employee of the Month (Nov 2021).

Good Glamm Group (Former MyGlamm) | Jan 2018 – Sep 2021

Software Engineer

- **System Migration:** Led the frontend migration of the primary E-commerce platform from Angular Universal to React.js/Next.js, implementing Server-Side Rendering (SSR) to improve SEO scores and caching performance.
- **Checkout & Payments:** Designed and built a high-conversion checkout funnel integrating payment gateways (Citrus, Razorpay) and token-based interceptor authentication.
- **Performance Engineering:** Improved mobile web performance through lazy loading, AMP implementation, and code splitting strategies.
- **Backend Services & Tooling:** Developed lightweight RESTful APIs in Node.js/Express, created a bulk SMS customer communication engine, and constructed an in-house CMS (Angular 10) for product and order management.
- **Analytics & Growth:** Integrated event-tracking frameworks (Adobe Analytics, GTM, WebEngage, Facebook Pixel, CleverTap) and executed A/B testing strategies to optimize user conversion rates.
- **Developer Mentorship:** Mentored junior frontend developers, conducting code reviews and onboarding team members onto modern React and Angular workflows.

BridgeLabz Solution LLP | Feb 2017 – Dec 2017

Product Trainee Engineer

- **Full-Stack MEAN Application Development:** Architected and built "Fundoo Notes" (a Google Keep clone) using the MEAN stack (AngularJS, Angular 2, Node.js, Express.js, MongoDB), implementing features for dynamic note creation, colour coding, reminders, and user authentication.
- **Component & API Design:** Developed modular, reusable UI components and integrated RESTful APIs with MongoDB backends to handle asynchronous data operations and state persistence across frontend views.

CERTIFICATIONS

- GitHub Copilot: Beginner to Pro – AI for Coding & Development | Udemy
- The Complete Artificial Intelligence and ChatGPT Course | Udemy
- Generative AI for Beginners | Udemy

EDUCATION

B.E. / B.Tech. in Computer Engineering

Pillai's HOC College of Engineering , Mumbai University, Mumbai | 2016

Diploma in Computer Engineering

Abdul Razzak Kalsekar Polytechnic, Mumbai University, Mumbai | 2013

PROJECTS

- **Iris Agent Studio - Iris Software - August 2026 - Present:** Leveraged React Flow to engineer an enterprise-grade Agent Studio canvas, transforming complex, multi-layered Python LLM backend processes into a seamless, interactive, and observable node-based UI.**Technology:** React, Redux, Tailwind, Python, PostgreSQL
- **MCP Nexus - Iris Software - August 2026 -Present:** Engineered an interactive, visual AI design platform that lets users visually orchestrate autonomous LLM workflows and dynamically manage multi-server tool registries through a real-time graph canvas.**Technology:** ReactJS, TailwindCSS, Python, LLM,PostgreSQl
- **HiSet Chatbot Web Application - Iris Software - April 28 2026 – August 30 2026:** HiSet Card is NextJs based AI Chatbot that transforms user questions into database queries and delivers relevant results in a conversational format.**Technology**: Next.js, ReactJS, JavaScript, Python.
- **Regulatory Execution Management System (REMS) Web Application – Iris Software – April 30, 2024 – Jan 30, 2026:** Developed a web-based platform for trade reporting, compliance monitoring, and order execution; supports MiFID II, SEC, and FINRA requirements, real-time trade execution, automated compliance validation, exception handling, market data/FIX integrations, external trading platforms, role-based access control, and audit trail dashboards. **Technology:** ReactJS, Redux, JavaScript, Node.js, Java, Oracle SQL.
- **OneView Portal – Iris Software – September 8, 2021 – Jan 30, 2026:** React-based Dealer Admin portal enabling approval, denial, and deactivation of products for specific groups and regions, along with primary sales coverage and comments. **Technology**: React, Redux, HTML, CSS, MarketAxess Shared Library (Material Design).
- **Linx AccountMaster – Iris Software – January 5, 2021 – Jan 30, 2026:** Full-stack portal managing countries, clients, dealers, products, and relationships among clients, dealers, and counterparties; maintained and updated features based on client requests. **Technology:** Angular, JavaScript, HTML, CSS, Java, Oracle SQL.
- **Instrument Admin Portal – Iris Software – December 2, 2021 – Jan 30, 2026:** Trading platform supporting instruments including loans, cash, and bonds; maintained and updated features as required. Technology: Angular, JavaScript, HTML, CSS, Java, Oracle SQL.
- **Dealer Admin Portal – Iris Software – November 9, 2022 – Jan 30, 2026:** Dealer Admin portal supporting product approval, denial, deactivation, regional/group controls, primary sales coverage, and comments. **Technology**: SmartClient, JavaScript, HTML, CSS, Java, Oracle SQL.
- **E-Commerce Mobile Website V2 – MyGlamm – February 18, 2020 – August 30, 2021:** React migration and maintenance of the mobile website with analytics tracking. **Technology:** React, NextJs, Redux, SSR, Socket.io, HTML, CSS, Analytics Events.
- **E-commerce Website / POPxo – MyGlamm – June 1, 2020 – August 30, 2021:** React-based e-commerce and content-commerce experience with SSR, AMP pages, and analytics events. **Technology:** React, Redux, SSR, HTML, CSS, Analytics Events, AMP Pages.
- **E-Commerce Mobile Website – MyGlamm – December 10, 2017 – March 9, 2020:** Developed and maintained the Angular Universal mobile website and contributed to website analytics. **Technology:** Angular 4–8, Angular Universal SSR, Bootstrap, HTML, CSS.
- **QRCode Verifier – MyGlamm – April 4, 2020 – August 30, 2021:** React-based module for verifying the authenticity of MyGlamm products.
- **E-Commerce Mobile Website (L'OCCITANE) – MyGlamm – July 10, 2019 – December 30, 2019:** Developed and maintained the mobile website for L'OCCITANE AU BRESIL as part of MyGlamm's client portfolio, including language translation support. **Technology:** Angular 4–6, Angular Universal SSR, Bootstrap, HTML, CSS.
- **E-Commerce Admin V2 (Content Management System) – MyGlamm – May 1, 2020 – August 30, 2021:** Angular 10 admin panel used by product and customer support teams to manage products, customers, discounts, orders, and content. **Technology:** Angular 10, Bootstrap, HTML, CSS, Socket.io.
- **E-Commerce Admin (Content Management System) – MyGlamm – October 1, 2017 – December 9, 2017:** Built a CMS from scratch for product and customer support teams to manage MyGlamm website operations. Technology: Angular 2, jQuery, Bootstrap, HTML, CSS. • E-commerce Backend – MyGlamm – 1 month: Worked on the Node.js/Loopback backend, focusing on email and SMS templates for consumer notifications. **Technology:** Node.js, MongoDB.
- **Artist Rating Backend – MyGlamm – 2 months:** Developed an API to collect and store customer feedback on artists providing services. **Technology**: Node.js, ExpressJS, MongoDB, MySQL.

- **Unity Dashboard – MyGlamm – 1 month:** Supported a dashboard for managing artists, clients, orders, appointments, availability, and invoices for beauty services. **Technology:** AngularJS, jQuery, Bootstrap, HTML, CSS, Node.js, SQL.
- **SMS Portal – MyGlamm – 1 month:** Developed a bulk SMS module allowing users to upload consumer details from an Excel file and send messages. **Technology:** AngularJS/2, jQuery, Bootstrap, HTML, CSS
